

inter medium et apicem; antennis pedibusque plus minusve obscure rufescentibus. Long. $5\frac{1}{2}$ lin. ♀.

Hiogo, three examples.

Of the same ashy-green colour as *C. 4-punctatus*, F., but of much narrower and more cylindrical form. The antennæ are slender and half the length of the body in the female. The thorax is long, very gradually narrowed in front and abruptly narrowed near the base. The elytra are sharply and obliquely truncated, with the exterior angle dentiform; each has, behind the middle, two transverse black spots, the first a little after the middle, and the second nearly midway between the first and the apex; near the base there are also two small black specks, one near the scutellum, the other on the humeral callus. The legs are long and slender; and the hind femora reach the tips of the elytra.

Clytanthus diminutus, n. sp.

C. parvus, cylindricus, angustus; niger, elytris macula communi pone scutellum, altera utrinque discoidali longe ante medium, fascia pone medium et margine apicali griseo-albis; antennis pedibusque piceo-rufis. Long. 2 lin.

Nagasaki, two examples.

Smaller and much narrower than *C. massiliensis*, Linn., more cylindrical. Antennæ filiform, as long as the body; third joint twice as long as the fourth. Front broad and plane, without ridges; antenniferous tubercles slightly elevated. Thorax oblong-ovate, rather more narrowed behind than in front, closely punctured; the base on each side bordered with light grey. Scutellum black. Elytra cylindrical, transversely truncated, exterior angle dentiform; a sutural spot behind the scutellum, a discoidal spot behind, a fascia remote from this behind the middle, and the apical border light grey. The sides of the breast and abdomen are spotted with light grey. The legs are moderately elongated, the thighs rather thickened.

Clytanthus annularis, Fab.

Clytanthus annularis, Fab. Ent. Syst. ii. p. 337.

This widely distributed eastern-tropical insect is abundant in Japan after the second week of August.

Xylotrechus Grayii, White.

Xylotrechus Grayii, White, Cat. Long. Col. Brit. Mus. p. 261, pl. vi. f. 4.

Nagasaki; also taken by Mr. Lewis at Shanghai.
